Dear Christoph,

Through some friends we got the program for the Unit n projects. It looks very well and I specially like the idea of letting artist do the word in this project. Also the cooperation of different organisations is something that appeals me. I know several of the participants in the program because they participated in our programs in the past. I've no idea if you're familiar with the V2 Organisation so I explain you a little about it. The V2 Organisation is an artist run space since 1981 and is focussed to art & technology. We try to analyze this phenomena in a program were people o different background (arts, science, research, philosophy etc.) meet in a program. This year for example all activities are in the context of the 'body', the body in relation to electronic space and the body as an architectural object that can be designed. The presentations finally will come together in our annual 'Manifestation for the unstable media' which this year takes place from October 1st till October 10.

Anyway at the moment I'm preparing some last parts of the presentations that take place pretty soon. In your program I saw some names and projects that took my interest and which is done by people I don't know yet. So I would like to ask you if you are willing to give me the name and address of Peter Weiss (BRD) and Station Rose also from Germany. I hope you will be able to find some time in between all activities.

Is it possible to get the publication you made on this project, or we exchange it with for example 'the book for the unstable media' which we released last year (a publication on art and technology with contributions of 9 artists, writers, architects) or just send me an invoice for the publication.

I wish you good luck with the realisation of the program and hope to hear from you soon.

On behalf of the V2 Organisation
 Alex Adriaansens
